HI-MACS[®]

THE PERFECT MATERIAL
FOR AIRPORTS

Natural Acrylic Stone

HI-MACS® BY LG HAUSYS

© Deutsche Lufthansa AG, Photographer: Christian Lauemper

Desks, counters and shelving at airports are exposed to extremely heavy and constant use. It is here that the perfect finish of HI-MACS® comes into its own – easy to clean and extremely robust, thanks to its innovative Thermalcure-technology.

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to produce a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

Quality Design

- Dramatic translucency for some colours
- 3-Dimensional Design
- Huge spectrum of colours and finishes
- Wide range of sinks and basins

Quality Performance

- Strong and Durable
- Fire Resistant
- Hygienic
- Water Resistant

Quality Fabrication

- Most advanced fabrication technology in the market
- Simple Processing
- Seamless Surfaces

Sustainable Quality

- Renewable and Repairable
- Sustainable

NAPLES INTERNATIONAL AIRPORT - CAPODICHINO
