HI-MACS[®]

THE PERFECT MATERIAL
FOR RETAIL APPLICATIONS

Natural Acrylic Stone

It is an accepted fact in retail, that no compromises can be made in terms of quality. And HI-MACS® does just what the high-tech brand LG promises. With its unlimited possibilities, the material meets the demanding requirements to perfection.

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to produce a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

Quality Design

- Dramatic translucency for some colours
- 3-Dimensional Design
- Huge spectrum of colours and finishes

Quality Performance

- Strong and Durable
- Fire Resistant
- Hygienic
- Water Resistant

Quality Fabrication

- Most advanced fabrication technology in the market
- Simple Processing
- Seamless Surfaces

Sustainable Quality

- Renewable and Repairable
- Sustainable

Photographs Oberpollinger Beauty Department: Dirk Wilhelmy, Stuttgart, Germany

HI-MACS® elements: Display furniture

A modern, minimalist interior space with a light-colored wall and ceiling. A series of vertical metal rods are mounted on the wall, supporting several white shelves. On these shelves, there are various items: a small potted plant, a pair of red high-heeled shoes, a pair of white high-heeled shoes, and a pair of black high-heeled shoes. The floor is a light, neutral color. In the foreground, there is a large, dark, angular object that looks like a piece of furniture or a sculpture. The overall atmosphere is clean and contemporary.
